KOALA ACOUSTIC

Dedicated to thoughtful and sustainable sound solutions

Designed to balance performance with visual appeal, Koala Acoustic creates products that enhance spaces both acoustically and aesthetically. Each panel is developed to meet the needs of modern interiors where function, design and wellbeing come together.

Manufactured in the UK and Ireland by Edit Office, every product is precision cut using CNC technology from our own warehouse. This ensures consistent quality alongside efficient production. Sustainability sits at the core of the brand, with every acoustic panel made from recycled materials to reduce environmental impact without compromising performance.

The collection is available in 24 colours, with selected options stocked for immediate delivery, giving designers, architects and businesses the flexibility to create quieter and more considered spaces.

- Desk Mounted Screens
- Bench Screens
- Wall Panels
- Workspace Dividers
- Planters
- Ceiling/Wall Tiles
- Grids
- Booths
- Printing
- Pin Boards
- Stools
- Wooden Slats

ABOUT THE KOALA MATERIAL

- Made from recycled material
- Fire Retardant Material
- Sound Absorbing Material
- Antifungal Material

Let's delve into the remarkable attributes of our Koala material. We're thrilled to offer PET material crafted from recycled sources, showcasing our commitment to sustainability. Moreover, our material boasts antifungal properties, proactively preventing mold growth and safeguarding against potential issues.

What truly sets our Koala material apart is its multifaceted benefits. Not only does it champion eco-friendliness through recycled PET materials, but its antifungal characteristics ensure a healthier and safer environment for all occupants.

Our 12mm and 24mm panels feature impressive Sound Absorption Coefficients, making them ideal for environments where noise reduction is paramount. Whether it's a bustling office or a lively restaurant, our Koala material contributes to a more serene atmosphere.

Additionally, our fire-rated material provides an added layer of safety and peace of mind in any setting. When you choose our Koala material, you're not just acquiring a product; you're investing in quality, sustainability, and innovation.

A modern office interior featuring a large wooden conference table with several grey and teal chairs. In the background, there is a brown sofa with blue and grey cushions, a potted plant, and a large window. The walls are decorated with blue and grey panels. Three large, dome-shaped pendant lights hang from the ceiling. The floor is covered with a grey rug.

KOALA
Lighting

SCARLET

Bring clarity and balance to your interiors with Scarlet, a sleek linear pendant designed for both visual impact and acoustic comfort. Engineered from high-performance sound-absorbing materials, Scarlet reduces background noise while delivering efficient, even illumination, making it an ideal solution for open offices, meeting rooms, and hospitality spaces. Its elongated silhouette creates a modern, minimal statement across ceilings, while the suspended design adds a sense of lightness and flow. Fitted with a replaceable linear LED source, Scarlet combines long-lasting performance with easy maintenance. A luminaire that refines both atmosphere and acoustics, Scarlet is where function meets understated elegance.

POPPY

Bring character and comfort to your interiors with Poppy, a pendant that combines soft curves with practical performance. Inspired by organic forms, Poppy's petal-like segments create a sculptural silhouette that softens ceiling landscapes while adding a touch of playfulness. Crafted from sustainable, sound-absorbing fabric, it reduces background noise and enhances acoustic comfort in open-plan offices, hospitality settings, and creative workspaces. Poppy delivers warm, ambient light and ensures easy long-term maintenance. Both decorative and functional, Poppy transforms ceilings into design features that improve atmosphere in more ways than one.

Grey

PENDANTS

JD, Thelma & Louise are pendants that combine bold design with acoustic performance, each offering a distinct form that works beautifully together. Thelma's precision cut panels create a graphic look, while Louise's smooth curves bring a softer, sculptural feel.

Thelma & Louise features a globe diffuser for warm, ambient light, balancing striking design with gentle illumination. Sustainably made and versatile, they work equally well together or as standalone pieces.

RECYCLING PET, REDEFINING SPACES

At Koala Acoustic, sustainability isn't an add-on – it's part of our story. Each panel is crafted from recycled plastic bottles, transforming waste into purposeful design. Engineered to soften sound and create calmer spaces, Koala panels combine exceptional acoustic performance with vibrant, solid colour throughout. They have become a trusted choice for managing reverberant sound and elevating interiors across workplaces, education, hospitality and beyond.

Our recycling process ensures every Koala panel has a life beyond its first use. This circular approach reduces waste, conserves energy, lowers carbon emissions and helps protect natural habitats. When panels reach the end of their service life, their materials can be recovered and reintroduced into production, keeping valuable resources in circulation and aligning acoustic wellbeing with environmental responsibility.

Guided by a mission to improve wellbeing and create healthier, happier spaces worldwide, Koala Acoustic continues to deliver innovative acoustic solutions and furnishings designed for the needs of the modern workplace and beyond.

FROM BOTTLE TO PANEL

Each panel is crafted from 100% polyester fibre, with up to 100% of the material sourced from recycled PET, mainly from plastic bottles. With low embodied energy and no chemical binders such as formaldehyde, Koala panels support healthier indoor air quality while reducing environmental impact.

THE PET PROCESS

The journey from a plastic bottle to a finished Koala Acoustic product.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
